PROJECTS

BUFFER CLOUDS:-

(Cloud Based Editor)

Buffer-Clouds is a Cloud-Based Editor is an advanced web-based code editor that enables users to write, compile, and execute code in multiple programming languages seamlessly. This platform is designed to facilitate coding, real-time collaboration, task management, and note-saving functionalities, making it an all-in-one productivity tool for developers.

CHAT APPLICATION :-

(socket.io)

Developed a real-time chat application using Node.js and Socket.IO. Implemented server-side logic in an Object-Oriented Programming (OOP) structure to manage multiple client connections, ensuring real-time, bi-directional communication. The project demonstrates strong backend development and independent work in a remote collaboration setup.

SKILLVIESTA:-

(nextjs)

SkillViesta is an immersive and modern skill showcase platform built with Next.js, designed to highlight individual talents through stunning UI and animations. It leverages cutting-edge web technologies to deliver a dynamic, responsive, and animated portfolio. It uses technologies like gsap, framer motion, threejs to make the UI more attractive. It shows the basic implementation of a nextjs workflow.
